CARE ADVISORY

Arranging care together?

When several of you are involved, it helps if everyone is looking at the same clear picture. A Care Options Report gives you one written report you can all read, share and talk through.

- What care would fit: help at home, housing with care or a care home, based on the needs you describe.
- Who could provide it locally, with current fees and the latest inspection ratings.
- How it could be paid for, including funding that is often missed.
- Every fact sourced and dated, so nobody has to take anything on trust.

Fixed fee £445. Shared between three people, that's under £150 each.

Your report arrives within 2 days of the completed form. Everything is handled by email, so it works wherever each of you lives.

One person completes the form and receives the report, ready to share.

> **Independent, always.** We are paid only by you, never by care providers, and we take no commission. We give research and advice only: we don't provide or manage care. If a report falls short, we redo it or refund you, as our terms explain. We cover England, Wales and the Channel Islands.
